SLERT/CONTROL/US OFFICIALS ONLY 50X1-HUM personnel of the 1st Mecz Div were loader on 8 November 1951. Since the soldiers were unarmed, they are believed to have been dischargees due for repatriation to the U.S.S.R. Altes Lager again quarters components of the 50X1-HUM lst Mecz Div The estimate of 3,000 troops in the present report cannot be evaluated. However, it appears plausible in view of the camp's billeting Olympisches Dorf is again occupied to capacity by components of the 1st Mecz Div. The installation was only partly occupied 50X1-HUM after July 1951, when the courses of instruction were moved from Olympisches Dorf to Wuensdorf. (4) The Adler Kaserne and the Loewen Kaserne are located on the south side of Hamburger Chaussee and constitute a collective billeting area which, according to the present report, is occupied by a total of 5,500 troops. Although this estimate appears somewhat too high, the 5,500 troops there, plus about 3,000 troops in Olympisches Dorf plus about 3,000 troops in Altes Lager would add up to about 11,500 troops, that is approximately the peacetime strength of a mechanized division. This indicates that, upon completion of the summer training period, the whole lst Mecz Div returned to its previous billeting areas at the Doeberitz military post. The entraining and detraining, which took place between 18 October and 2 November 1951, confirms that components of the 1st Mecz Div participated in field exercises in the Soviet Zone of Germany during that period.
